

# Topic: Energy in Australia

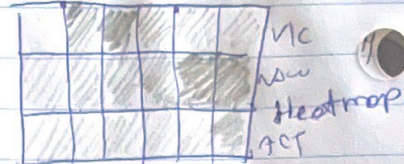

① Map  
renewable - stor %

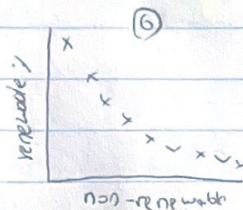

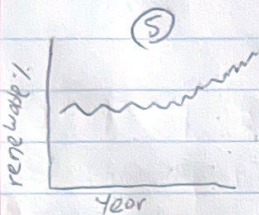

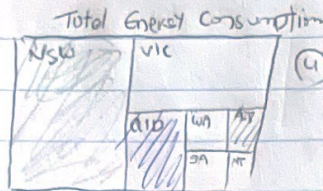

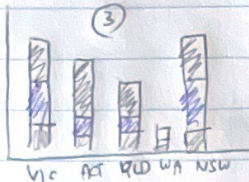

② coal wind energy %

FILTER

Might be a bit hard to implement and to also add relevant filtering features

CATEGORISE

Attributes

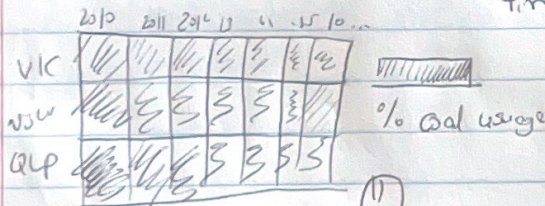

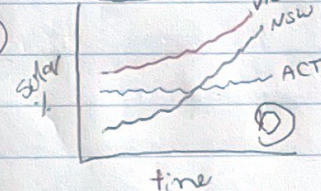

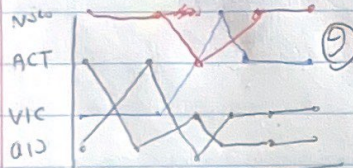

Categorical

Quantitative

• states  
• countries

• time  
• elec %  
• cons %  
• prod %  
• renew %  
• non-renew %  
• energy usage

2024 June Coal Consumption

Combine  
Map + world Map

line chart

⑤+⑥+⑨ large time-series  
Focus on all renewables  
for all different states  
with filter selection.

Question

Is it better show world  
if topic is on Australia?

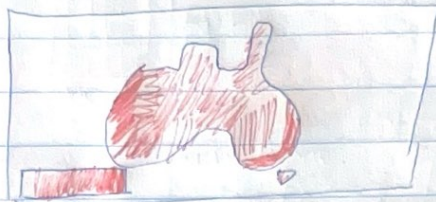

Is a heatmap too hard to  
design

# ELECTRICITY PRODUCTION ENERGY IN AUSTRALIA

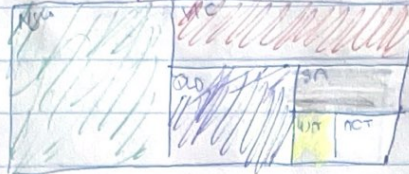

Introductory info

5th Mthly cap  
5,483,826  
oil

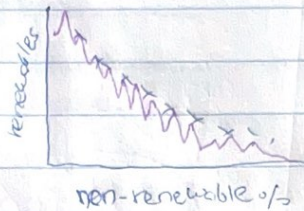

QWA  
VIC  
NSW  
QLD  
ACT  
SA

PROJECTED ELECTRICITY PRODUCTION  
PER CAPITA

Text about energy  
in Australia

Text about different  
states and  
comparisons

Final remarks plus concluding  
information

Title: 2nd Initial Design

Author: Sai Ramishetty

Date: 4/10/2024

Description:

First initial design

Components

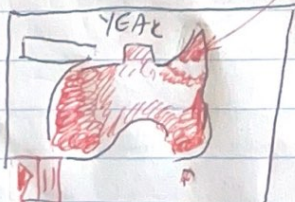

- Have component when you press a state.

It would highlight that state in all regions

Tod tips

- state, electricity, renewable, non-renewable, region, sec-from non-renewables

FOCUS

would focus on each particular region in Australia

pause/play to see progression through years

Pros & cons

- Interactive

Cons

- Not much annotations
- Report-like

# ELECTRICITY PRODUCTION ENERGY IN AUSTRALIA

## Introduction

World Map Energy : AUS with world

## Australia Sources

3rd highest  
producer of  
carbon

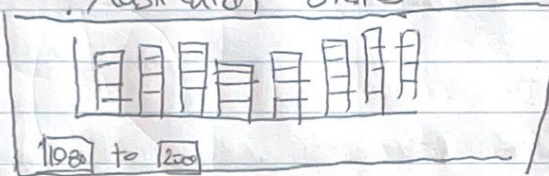

## Australian States

Info about  
different  
states prod.

Analysis about  
change in  
sources

## Australian States

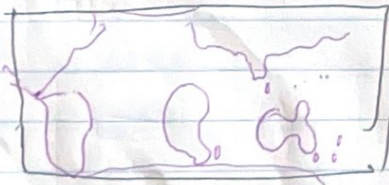

## FINAL ANALYSIS

## FOOTER

## FOCUS

- A hierarchical approach world → AUS → state
- Equal weightage

focus on  
increase of  
electricity prod.  
in state

Title: 3rd

Design sheet

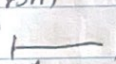

Author: Sai Ramishetty

Date: 4/10/2024

sheet #: 3

Task: 3rd visualization

## Operations

- Select the range of the years (states)
- Select from slider  1 chose year

## Tool tips

year, country, <sup>non-renew</sup> electricity,  
state, state, energy source

## Discussion

- Hierarchical approach
- Well structured
- Follow column approach

- Not too much text
- Radix plot confusing

## Electricity Production in

77% is non renewable

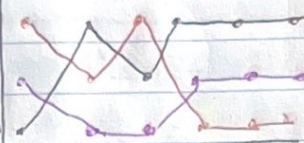

COAL used  
often (highest)

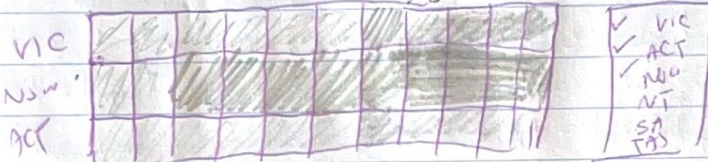

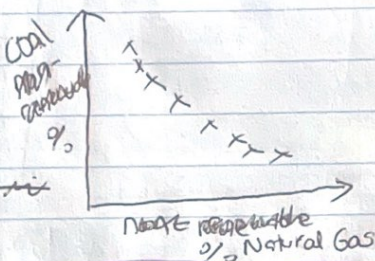

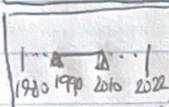

|                                         |                                         |
|-----------------------------------------|-----------------------------------------|
| <input checked="" type="checkbox"/> OLD | <input checked="" type="checkbox"/> NGL |
| <input checked="" type="checkbox"/> VIC | <input type="checkbox"/> TAS            |
| <input type="checkbox"/> ACT            | <input type="checkbox"/> SA             |
| <input type="checkbox"/> NT             |                                         |

☒ NSW  
☐ TAS  
☐ SA

QLD  
VIC  
NSW

NSW highest  
37%.

Title: 4th Design

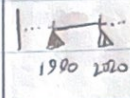

Author: Sai Permisetti

Date: 04/10/2024

Sheet: 4

Task: Designed poster.

☒ → Add the state to the comparison

moves slider and  
readjust data points

- year, electricity prod

Filter for each  
state links to  
bump chart

Comparing renewables  
% in electricity  
production for all  
countries.

comparing intensity  
of electricity  
production from  
coal here

Pros

- wider variety
- use of filtering

Cons

- No defined order
- ~~Not enough graphs~~
- Not enough text
- No Space

# ELECTRICITY PRODUCTION

## Introduction

### Australia WITH the world

3<sup>rd</sup> highest  
in non-renewable

88%

### Australia and its electricity sources

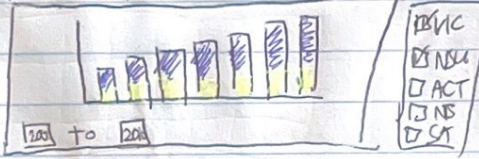

50%  
Coal  
Carbon

Short statement  
on renewables  
growth

### Inside Australian States

NSW highest  
producer

## FOOTER (METADATA)

### FOCUS

All countries with  
non-renewable  
energy production

Comparing different  
countries

darken shade shows more importance  
similar to the previous

Detail Final Des.
